Raffles City Tower

Supporting a Landmark in Singapore's Skyline

Raffles City Tower is one of Singapore's most recognisable mixed-use developments and a key part of the city's commercial landscape. Designed by world-renowned architect I.M. Pei, the development continues to be an important destination for business, hospitality and retail.

VSH XPress copper press fittings contributed to this flagship project, showcasing proven performance within a large-scale development that demands long-term reliability and quality.

Marina One

Delivering Reliable Solutions for an Iconic Mixed-Use Development

Located in the heart of Marina Bay, Marina One is one of Singapore's most prestigious mixed-use developments, combining premium office space, luxury residences and retail facilities within a striking architectural landmark.

VSH XPress copper press fittings supported this flagship project, providing a dependable solution that met the demands of a modern, high-performance development in one of Singapore's most prominent business districts.

Capital Tower & CapitaGreen

Trusted in Singapore's Premium Commercial Buildings

VSH XPress has been specified in leading Grade-A commercial developments, including Capital Tower and CapitaGreen, two landmark office towers within Singapore's Central Business District.

These prestigious projects highlight the confidence major developers place in VSH XPress, demonstrating its ability to support high-quality commercial building services where reliability, efficiency and performance are paramount.
